

Cervical Thoracic Orthosis

Adjustable design, strong and light weight

Product information

Model:

KDZJ-JZ-002

Specifiation:

Universal

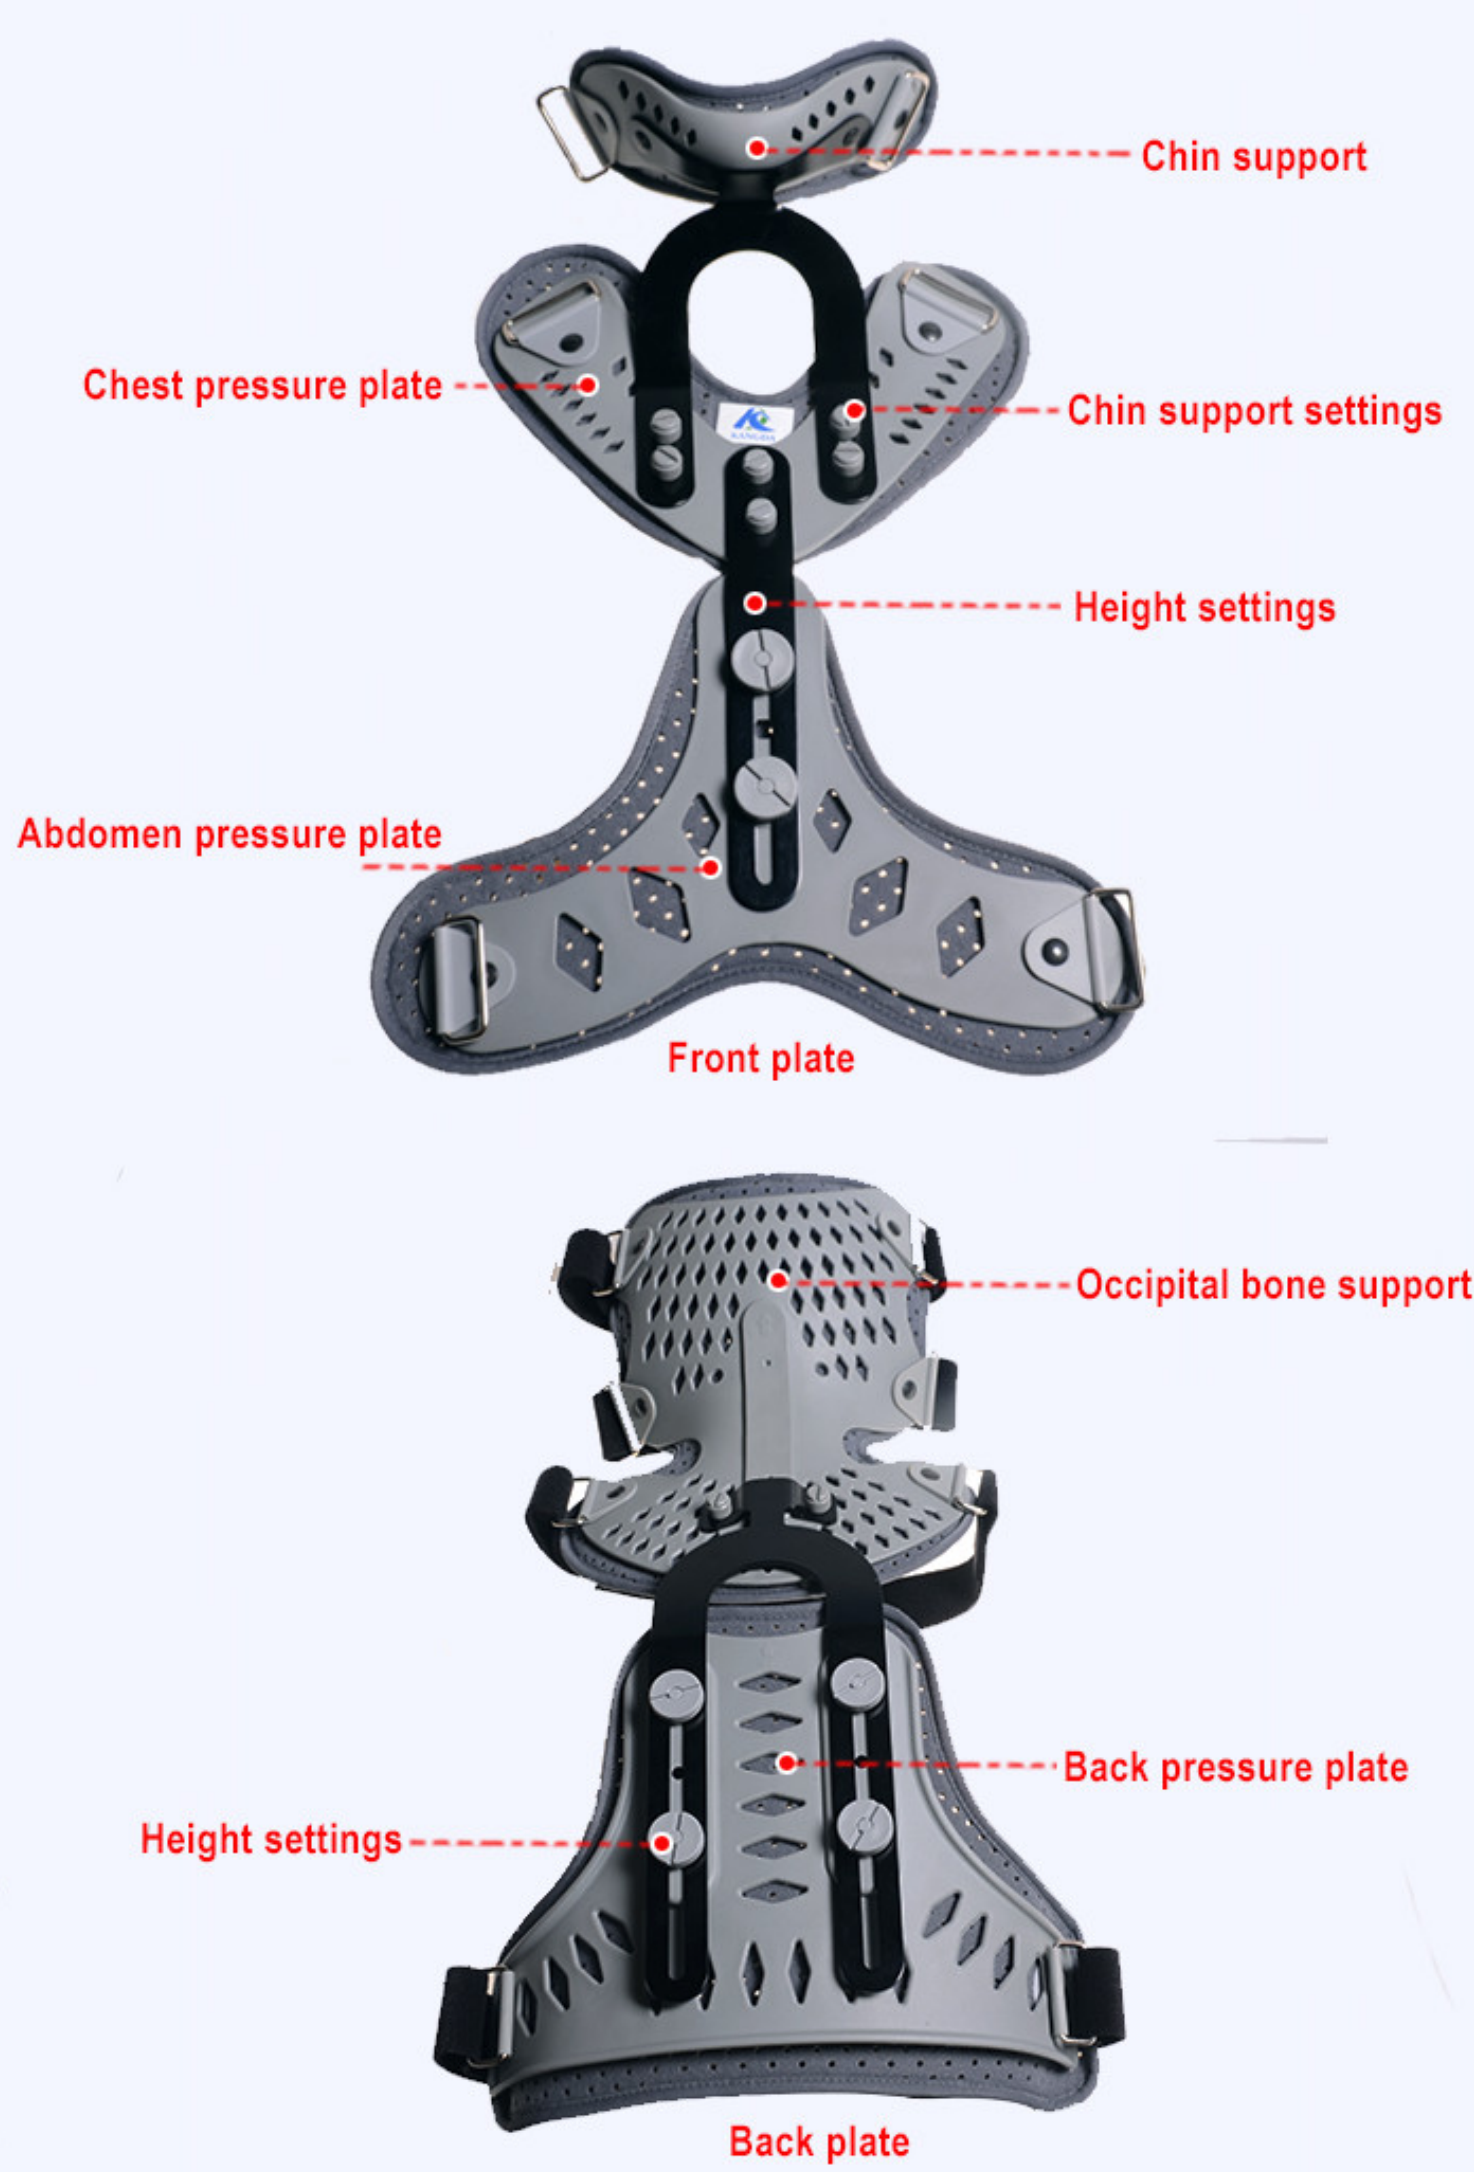

Product composition:

Plasticplate, alloy bars and textile fabric

Scope of application:

- ✓ Conservative treatment for cervical spine (except atlantoaxial spine) and high thoracic stable fracture, dislocation, and sprain injuries
- ✓ Post-operative immobilization and protection for cervical spine (except atlantoaxial spine) and high thoracic injuries
- ✓ Immobilization and protection for cervical spine (except atlantoaxial spine) lesion

Product structure

Product characteristics

Adjustable design

Tool-free adjustment according to different body types with lots of control apparatus, applicable to crowd

Strong and light weight

Strong polyethylene material, light weight, high resist bending fatigue, hard to deform, high strength, ensure enough support strength for brace immobilization with alloy Support bar.

Adjustable support design for chin

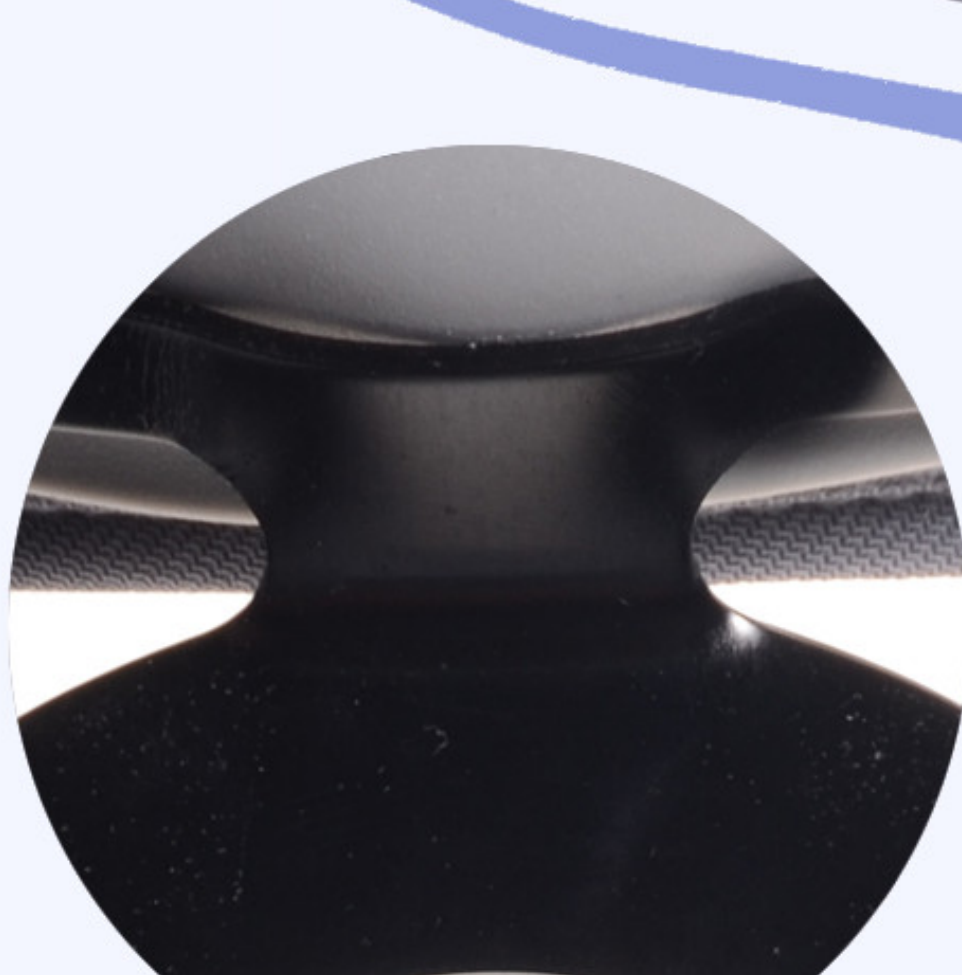

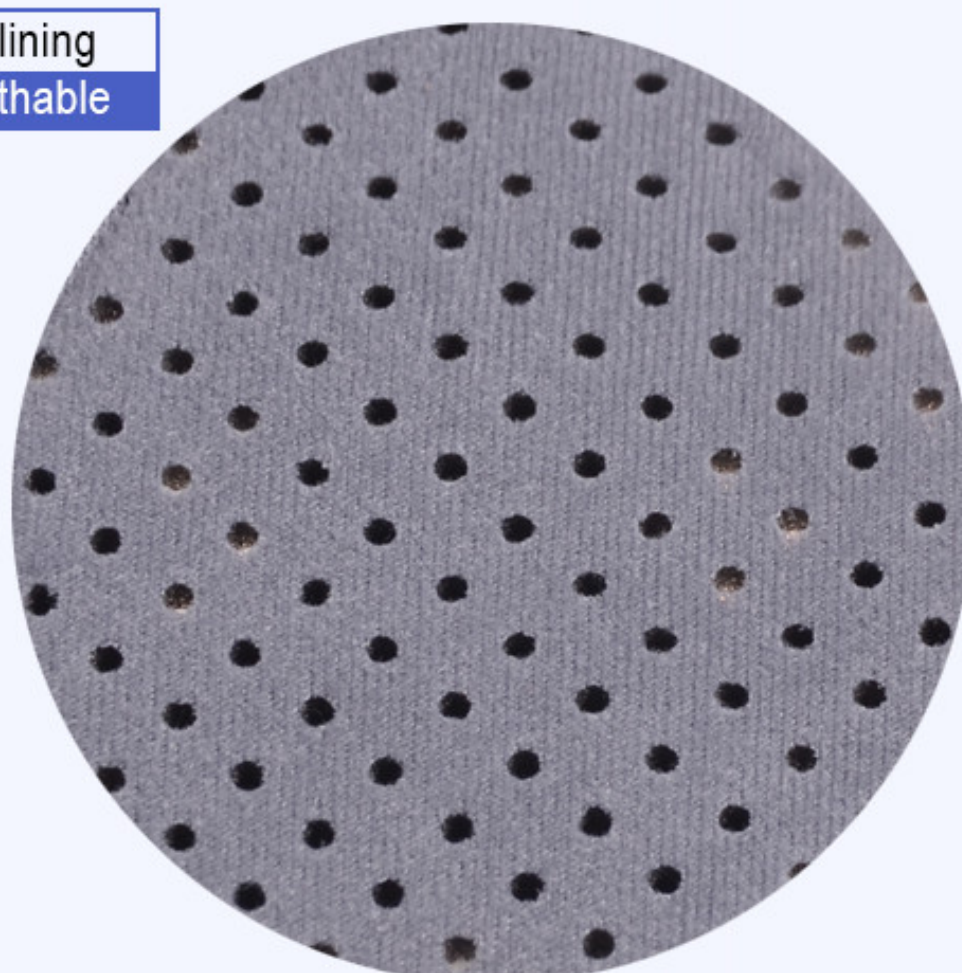

Adjustable according to patient's chin shape, more comfortable to wear

Product details

Stamping and perforating lining

soft ,comfortable and breathable

Alloy bar

light weight ,good support
