## COMPRESSOR NEBULIZER

### DESCRIPTION

NB-219C

- One button operation for easy use
- Concise and streamline design
- Highly effective delivery of medicine
- Portable for home and clinical use
- Large accessory compartment
- Powerful piston pump

Nebulizers is a medical device designed to deliver drugs through inhalation to treat the common upper and lower respiratory tract such as asthma, bronchopulmonary and other obstructive respiratory disorders. It uses compressed air which turns liquid particles into a gas form allowing effective inhalation.

The NB-219C Compressor Nebulizer is compact and portable for easy usage both in home or clinical environment, comes with a handset to make it easier to carry anywhere. It has a docking station which holds the nebulizer cup to pour in the medication with ease. A large compartment to store accessories. Low noise operation suitable for children at night to sleep without disruption.

### SPECIFICATION

Rated Voltage	AC 230V, 50HZ
Electrical Safety	Class II, Type B
Free Flow Range	16L/min ~ 23.5L/min
Nebulizing Pressure	100Kpa ~ 190Kpa
Nebulizing Flow	10 Liter/min
Extreme Pressure	>205 Kpa
Rated Power	≤200VA
Max Capacity of Medication Tank	10ml
MMAD	~3.4μm
FPD	≤5μm / 60%
Nebulizing Rate	≥0.2ml/min
Noise Level	≤60dB
Size	280mm x 180mm x 88mm
Package includes	Nebulizer kit, adult mask, child mask, inhalation mouthpiece, inhalation tube, adapter, instruction manual, warranty card
