

COMPRESSOR NEBULIZER

Model: NB-212C

Main Features

- Nebulisation with compressed air technology
- One-button operation for easy use
- Certified medicinal product
- Highly effective delivery of medicine
- For targeted treatment of diseases of the upper & lower respiratory tract (e.g. asthma and cold)
- With a design to fix nebulization unit in the handle position, compact and lightweight
- small enough for home use

Rated Voltage: AC 230V, 50Hz

Extreme Pressure: >205Kpa

Nebulizing Pressure: 100~190Kpa

Noise Level ≤ 55Db

Max Capacity of Nebulizer Kit: 10ml

Nebulizing Rate ≥ 0.2ml/min

MMAD (Partical Size): 4.2μm

FPD ≥75%

Continuous Working Time ≥4 hours

Size: 195(L) ×135(W) ×92(H)mm

Nebulizer Accessories

Specially developed nebulizer accessories also support the nebulize of the drugs. They always create the optimal particle size depending on the area of application, targeting the upper and lower respiratory tract. The effect is felt quickly and a minimum of medication has to be used, making it also ideal for use with children.

Nebulization Cup

Baffle Plant

For multifunction nebulization cup
Special design for multiple drugs & diseases

Baffle Red
MMAD: 5.0μm
Upper respiratory tract

Baffle Blue
MMAD: 4.0μm
Universal

Baffle Yellow
MMAD: 3.5μm
Lower respiratory tract

High Effective Medication Cap

Optional Accessory
Model: NB-N106

MMAD≤2.8μm
FPD≥90%
Residual liquid volume≤0.1ml
Low noise≤50dB
