Product name	Bedside locker
Model Number	Blue(with caster)
Lot number	BXC25112001
Inspector Name	Hu Haitao
Standard Number	ISO 13485
Checker name	Zhang Chaoya
Date	2026-03-20
Quantity	10 units (Sampled)
Produce date	2026-03-14

1. Specification Dimensions

There are two specifications: 480×480×760mm and 450420740mm. (Note: Deformation ≤10MM is within the normal cold - shrinkage deformation range).

2. Material and Manufacturing

The whole is made of high - quality modified polypropylene plastic, and is integrally injection - molded. It is resistant to aging and fading, with high - strength plate material, and has a beautiful and generous appearance.

3. Components

The bedside cabinet is composed of a cabinet body, a top cover, a cabinet door, a drawer, a pull - out plate, a towel rack, etc.

4. Cabinet Body

- The front shape of the cabinet body is arc - shaped. The left and right side surfaces are equipped with foldable and hidden towel racks and hooks (small - sized ones have no hooks). They can be extended when needed and folded back into the side of the cabinet body when not in use, with an angle range of 90 degrees.
- Universal wheels can be installed at the bottom of the cabinet body for easy movement.

5. Drawer

- The outer shape of the drawer panel is arc - shaped. There is a drawer handle hole under the panel for easy pulling and closing of the drawer.

6. Pull - out Plate

The pull - out plate is pre - set with grooves for placing cups and thermometers, facilitating access.

7. Cabinet Door

- An internal storage box is set inside the cabinet door, making it more convenient to access small items.

8. Interior Structure of Cabinet Body

- There is a partition in the cabinet body. The position of the partition can be adjusted according to the height of the items, with a two - level adjustment function.
- The inside of the door can hold a thermos flask, and there is a placement groove on the bottom plate.

9. Reinforcement of Cabinet Body

- The side plate of the cabinet body has arc - shaped reinforcing ribs, which improve the support strength and firmness of the cabinet body.
- The convex position inside the reinforcing ribs cooperates with the groove of the partition to increase the stability of the partition's position.

10. Wheels

There are four wheels.

Inspection Results

All 10 sampled bedside cabinets meet the above - mentioned requirements.
